

Freestanding Pump

Product Outline

Fix

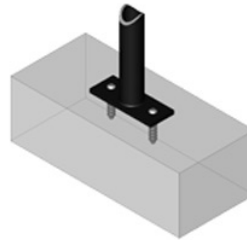

Finishes

Powder Coat

1. Sandblast raw product.
2. Spray statically charged powder evenly around the bike rack.
3. Cook in a powder coat oven at 350°-375°F, this allows the powder coated paint to liquify and cure to the product.

Mounting Options

Surface

Base plates are anchored to the concrete using secure anchors. Greenspoke includes the general hardware required but there are several other hardware options also available.
