

4-Post, 16' Bike Shelter

Model: 855010

- Simplified Specifications -

Rev.: 11Apr18

Description:
This shelter is designed to provide maximum weather protection for 10 or more bikes. The frame is constructed from rugged tubular steel and the roofing panels are corrugated steel. The 4-Post design provides superior stability and the modular system is simple to assemble. The columns can be anchored directly to a reinforced concrete pad or to 4 separate concrete piers.
