ABOUT GREENSPOKE

The team at Greenspoke has extensive experience with industrial design and the fabrication of bike parking products. We offer a diverse collection of bike racks and repair solutions with an unwavering commitment to producing durable, attractive and eco-friendly products. Whether our catalogue offers the solution you're looking for or simply sparks a new idea, we can make your vision a reality.

Current Designs and Specifications:

As a quality-conscious manufacturer, we are constantly evaluating and improving our products to better serve the needs of our customers. As such, current designs, finish options and specifications may change over time without notice.

Note: Detailed specifications for all models are available upon request. These specifications generally include all dimensions and a complete list of materials, hardware, available finishes and notes on installation.

BIKE PARKING CONSIDERATIONS

The bike parking area should be located near a major entrance.

VISIBILITY

The bike rack should be easily visible from the road and not in an isolated area.

SPACE

The user can comfortably maneuver around their bike to lock and unlock it.

SAFETY

Bike racks should have ample space around their perimeter to avoid any collisions with surrounding structures.

CONVENIENCE

Parking area should be easy to access from the cycling route.

WEATHER PROTECTION

Bike and bike accessories should be kept dry while bikes are parked.

SECURITY

Parking area should be well lit, free of hiding places and a video monitor should be visible to the user.

AVAILABILITY

Plan your space based on maximum capacity and keep future additions to the parking area in mind.

GREENSPOKE BIKE PARKING SOLUTIONS

GREENSPOKE BIKE PARKING SOLUTIONS

LOW VOLUME PARKING

Single Post Rack

The Single Post conveniently parks 2 bikes with a small footprint that minimally impacts the sidewalk space when not in use.

5 Loop Rack (Municipal Style)

6-8 BIKE CAPACITY

The 5 Loop Rack provides convenient parking for up to 8 bikes and is favoured by many municipalities. The solid steel loops provide added security and the custom logo panels offer a location for advertising or identification. Standard versions come with a blank, solid end disk suitable for vinyl graphics (applied by customer). Your Greenspoke representative can advise if your logo or text is suitable for laser-cutting.

Twin Topper Bi-Level Bike Rack

√ 4-6 BIKE CAPACITY

The Twin Topper Bi-Level Bike Rack allows you to park 2 bikes in the space normally required for 1 bike. This system has no moving parts which makes it safe, secure and reliable. The upper tiers are well-suited for lighter road or hybrid city bikes that must be lifted up into the convenient, self-guiding trays. Simply set the front wheel into the tray and push the bike ahead until the rear wheel is securely in the rear chock. The first component required is the 6-Bike Starter Module which is fully self-supporting. You can then add any number of 4-Bike Add-On Modules.

PRODUCT	MODEL#	MOUNT	FINISH	DIMENSIONS

The CVR-W & CVR-S

4 BIKE CAPACITY (PER MODULE)

The CVR (Compact Vertical Rack) allows you to hang bikes vertically from the front wheel in order to save space and get bikes up off the floor. This is a simple system that has no moving parts which makes it safe, secure and reliable. A square tube guide bar for each bike provides multi-point locking capability to the bike's frame or wheels.

Pinnacle-A Rack

√ 4-8 BIKE CAPACITY

The Pinnacle-A Rack achieves high density bike parking by alternating the height for every other bike. The 8-1/2" height difference prevents the handlebars from contacting those of the next bike making it easier to park or remove bikes without damage. The Pinnacle-A Rack also provides superior security by including multiple locking points and excellent support for each bike. The rack itself is made from both heavy gauge steel and solid steel rod, furthe enhancing security and stability.

BIKE SHELTERS

2 Post Shelter

№ 8 BIKE CAPACITY

With its smaller footprint, this simple but effective 2 Post Shelter can protect 6-8 bikes from the worst elements and the mid-day sun. The frame is constructed from rugged, tubular steel and the roofing panels are corrugated steel. This design is simple to assemble and multiple shelters can be linked together (daisy-chained) to provide a protective colonnade of infinite length. Columns can be anchored directly to a reinforced concrete pad or to concrete piers.

Skateboard Repair Station

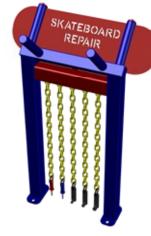

→ 1 SKATEBOARD CAPACITY

The Skateboard Repair Station provides 5 of the most commonly required tools to perform typical skateboard repairs or adjustments. The tools are safely secured on flexible chain tethers for ease of use. The tethers are then fitted to a locking channel which is secured between the support posts. The vinyl coated cradle holds the skateboard in the optimum position to perform repairs.

1/2"-13 thread tamper-resistant anchoring hardware is included to secure the station to a concrete pad.

TOOLS INCLUDED:

- Philips Screwdriver
- 1/8" Allen / Hex Driver
- 3/8" Socket Wrench (Mount Hardware)
- 1/2" Socket Wrench (Axle Nut)
- 9/16" Socket Wrench (Kingpin)
